Subject index*

A

Acid, polyinosinic-polycytidylic acid, release of colony-stimulating factor from monocytes by endotoxin and, 64

Adenosine-3′, 5′-monophosphate, lack of effect of erythropoietin on cyclic, levels in rat fetal liver cells, 288

β-Adrenergic blockade with propranolol, on the mechanism of suppressed plasma-renin activity during, 119

Airway obstruction, acute, in rhesus monkeys induced by pharmacologic and immunologic stimuli, 749

Aldosterone and renin response to diuretic-induced volume depletion, influence of dietary potassium on, 249

plasma renin concentration, comparison of angiotensinase inhibitors and correlation with plasma renin activity and, 705

Alveolar cells, nitrofurantoin lung sensitivity, report of a case with prolonged nitrofurantoin lymphocyte sensitivity and interaction of nitrofurantoin-stimulated lymphocytes with, 728

macrophages, in vitro hydrolase and phagocytic activities of, 738

Ammonia or fatty acids in the reproduction of coma, possible role for mercaptans in pathogenesis of hepatic coma, synergism between mercaptans and, 16

Ammoniagenesis in isolated dog renal tubules, oxygen consumption and, 937

AMP, cyclic, rat liver, neonatal changes in concentration of, and of serum glucose, free fatty acids, insulin, pancreatic, and total glucagon in man and in rat, 957

Amylase isoenzymes during viral infections of pancreas and salivary glands, 761

Anemia, maternal, and kidney, role of, erythropoietin production in fetus, 271

sickle-cell, erythrocyte composition in, 611

Angiotensinase inhibitors, comparison of, and correlation with plasma renin activity and aldosterone, plasma renin concentration, 705

Announcements, 680, 990

Anti-antibody and other antiglobulin specificities in nonrheumatoid and rheumatoid effusion fluids and matched sera, 104

Antibiotic combinations, therapy of experimental staphylococcal infection with, 241

Antibodies, hemagglutinating, to Fisher-Devlin-Gnabasik immunotypes in sera, pseudomonas endocarditis, 945

human, to IgE, simple method to avoid ambiguous results of radioimmunosorbent test (RIST), 831

Antibody, horseradish peroxidase-labeled, surface immunoglobulins on human peripheral lymphocytes, preparations stained with, 584

Antigenic differences in functionally normal antihemophiliac globulin in different bovine strains, 467

Antigens common to human and bacterial cells, studies of human pneumococcal disease, 599

pneumococcal, diagnosis of bacterial diseases by detection of serum antigens by counterimmunoelectrophoresis, sensitivity, and specificity of detecting *Pseudomonas* and, 591

Antihemophiliac globulin in different bovine strains, antigenic differences in functionally normal, 467

Antihemophilic factor (AHF, factor VIII), elevated, procoagulant activity and AHF-like antigen in alcoholic cirrhosis of liver, 189

Atrial pacing in humans, criteria for detecting ischemic myocardial hypoxia from lactate and pyruvate data during, 428

Aurothiomalate therapy, gold kinetics following, use of whole-body radiation counter, 778

B

Bacterial cells, antigens common to human and, studies of human pneumococcal disease, 599

*January, pp. 1-174; February, pp. 175-338; March, pp. 339-510; April, pp. 511-680; May, pp. 681-844; June, pp. 845-1008.

Bacterial—Cont'd
diseases, diagnosis of, by detection of serum antigens by counterimmunoelectrophoresis, sensitivity, and specificity of detecting *Pseudomonas* and pneumococcal antigens, 591
sepsis, deiodination of 1-thyroxine in vitro by peripheral leukocytes from rhesus monkeys with, 902
Bence Jones protein-producing tumors, effect of sustained diuresis on renal lesions of mice with, 409
Bile acids, free and conjugated, on net water, electrolyte, and glucose movement in perfused human ileum, effect of, 947
Bilirubin glucuronidation, hepatic, in neonates with unconjugated hyperbilirubinemia and congenital gastrointestinal obstruction, 90
plasma, turnover and carbon monoxide production in man, comparison of, 29
unbound and reserve, binding capacity in serum of newborns, electrophoretic method for detection of, 968
Binder, folate, direct radiochemical assay for serum folate, competition between ^{3}H-folic acid and 5-methyltetrahydrofolic acid for, 164
Blood concentrations of cyanate after intravenous administration to patients with sickle-cell disease, determination of, 139
human, gel filtration technique for separation of erythrocytes from, 840
whole, refrigerated, effect of prostaglandin E_1 on harvesting of platelets from, 304
Body potassium, total, predictor for, in man based on height, weight, sex, and age, applications in metabolic disorders, 716
Bovine plasma, factor VII-depleted, assay for coagulation factor VII using, 301
strains, antigenic differences in functionally normal antihemophiliac globulin in different, 467

C

Cadmium and mercury, metal-induced hypertension following chronic feeding of low doses of, 541
Calciferol metabolism and intestinal calcium transport in chick with reduced renal function, 38
Calcium transport, intestinal, in chick with reduced renal function, calciferol metabolism and, 38
Carbon monoxide production in man, comparison of plasma bilirubin turnover and, 29
Cells, bacterial, antigens common to human and, studies of human pneumococcal disease, 599
Cells—Cont'd
phagocytizing, oxygen consumption of, in human leukocytes and granulocyte preparations, a comparative study, 570
rat fetal liver, lack of effect of erythropoietin on cyclic adenosine-3′, 5′-monophosphate levels in, 288
spiculated, in vivo, red cell cholesterol depletion and formation of, 436
Cellular immunity after intravenous administration of methylprednisolone, 383
Cephalexin and penicillin, immunologic cross-reactivity of, 860
Chelating agents, preparation and prolonged tissue retention of liposome-encapsulated, 640
Chemotactic factor, studies on crystal-induced, requirement for protein synthesis and neutral protease activity, 56
Cholesterol, depletion, red cell, and formation of spiculated cells in vivo, 436
synthesis by cultured fibroblasts, decreased feedback inhibition in familial hypercholesterolemia, 7
Chromatography, gas-liquid, quantitative determination of methylated nucleosides and pseudouridine in urine by, 816
Chymopapain injected for therapy of intervertebral disc disease, fate of, 532
Cirrhosis, alcoholic, of liver, elevated antihemophilic factor (AHF, factor VIII) procoagulant activity and AHF-like antigen in, 189
Colonic absorption of vitamin K-3, 648
Colony-stimulating factor, release of, from monocytes by endotoxin and polyinosinic-polycytidylic acid, 64
Coma, possible role for mercaptans in pathogenesis of hepatic coma, synergism between mercaptans and ammonia or fatty acids in production of, 16
Concanavalin A, effect of, on human platelets and response to thrombin, 887
Connective tissue activation, effects of cyclic nucleotides on human synovial cells in vitro, 46
Contraceptives, oral, appearance of folate binder in leukocytes and serum of women who are pregnant or taking, 207
Counterimmunoelectrophoresis, sensitivity, and specificity of detecting *Pseudomonas* and pneumococcal antigens, diagnosis of bacterial diseases by detection of serum antigens by, 591
Cyanate, determination of blood concentrations of, after intravenous administration to patients with sickle-cell disease, 139
effects of, on clottability of fibrinogen, 790
upon 2,3-diphosphoglyceric acid metabolism, 577
Cyclophosphamide on responses to influenza immunization, mechanisms of immunosuppression, effect of, 504

Cyproheptadine, effect of, chronic autologous immune complex glomerulopathy, 695
Cytochrome $c+c_1$ to cytochrome $a(+a_3)$, phosphorylative capacity of liver mitochondria with elevated ratio of, 97

D

2,3-Diphosphoglyceric acid metabolism, effect of cyanate upon, 577
Diuresis, effect of sustained, on renal lesions of mice with Bence Jones protein-producing tumors, 409
Diuretic-induced volume depletion, influence of dietary potassium on renin and aldosterone response to, 249
DNA in zinc-deficient tissue, thymidine kinase activity and incorporation of thymidine into, 634
Dog renal tubules, isolated, oxygen consumption and ammoniagenesis in, 937
Drugs, nonsteroidal anti-inflammatory, inhibition of platelet adherence to collagen coated surface by, pyrimidopyrimidine and tricyclic compounds, and lidocaine, 797

E

Editors, letter from the, 1
Effusion fluids and matched sera, anti-antibody and other antiglobulin specificities in nonrheumatoid and rheumatoid, 104
Electrolyte, water, and glucose movement, in perfused human ileum, effect of free and conjugated bile acids on, 947
Electrophoretic method for detection of unbound bilirubin and reserve bilirubin binding capacity in serum of newborns, 968
Endocarditis, pseudomonas, hemagglutinating antibodies to Fisher-Devlin-Gnabasik immunotypes in sera, 845
Endotoxin and polyinosinic-polycytidylic acid, release of colony-stimulating factor from, 64
Energy metabolism, oxidative, in skeletal muscle, biochemical and ultrastructural evidence for adaptive changes, 548
Eosinophil levels, variations in peripheral blood, in normal and *Schistosoma mansoni*-infected mice, 871
Erythroblast ferritin, synthesis, structure, and function in developing erythroid cells, 478
Erythrocyte composition in sickle-cell anemia, 611
  disorders, glycerol lysis time as a screening test for, 323
  gel filtration technique for separation of, from human blood, 840
  glutathione flux to oxidized glutathione transport system, relationship of in vivo, 444
  separated, rheologic studies of deoxygenated normal and hereditary spherocytosis blood and, 112
Erythrocyte—Cont'd
  vacuole formation, mechanism of drug-induced, 215
Erythroid cells, erythroblast ferritin, synthesis, structure, and function in developing, 478
Erythropoiesis inhibitors, determination and physiologic effects of, 625
Erythropoietin, lack of effect of, on cyclic adenosine-3′,5′-monophosphate levels in rat fetal liver cells, 288
  production in fetus, the role of kidney and maternal anemia, 281
Estrogens and a progestogen on platelet adhesiveness and aggregation on rabbits, effect of, 79
  effects of, on hematopoietic stem cells and on hematopoiesis of mice, 807
Ethanol or oleate, effect of, gluconeogenesis in cirrhotic liver of rat, 175
Experimentation, human, 1974, 339

F

Factor VII, assay for coagulation, using factor VII-depleted bovine plasma, 301
Fat, dietary neutral, in man, derivation of plasma-free fatty acids from, 393
Fatty acids, free, serum glucose, insulin, pancreatic, and total glucagon in man and rat, neonatal changes in concentration of rat liver cyclic AMP and, 957
  in the production of coma, possible role for mercaptans in pathogenesis of hepatic coma, synergism between mercaptans and ammonia, 16
  plasma-free, from dietary neutral fat in man, derivation of, 393
Ferritin, erythroblast, synthesis, structure, and function in developing erythroid cells, 478
  human, in an inhibition-type radioimmunoassay, effect of iron content on behavior of, 147
Fetus, erythropoietin production in, role of kidney and maternal anemia, 281
Fibrin cleaved by plasmin, in vivo behavior of terminal derivatives of fibrinogen and, 458
Fibrinogen and fibrin cleaved by plasmin, in vivo behavior of terminal derivatives of, 458
  effects of cyanate on clottability of, 790
  related material, urinary, methodologic aspects, measurement of, 921
Fibroblasts, cholesterol synthesis by cultured, decreased feedback inhibition in familial hypercholesterolemia, 7
Fisher-Devlin-Gnabasik immunotypes in sera, pseudomonas endocarditis, hemagglutinating antibodies to, 845
Fluids, effusion, and matched sera, anti-antibody and other antiglobulin specificities in nonrheumatoid and rheumatoid, 104
Fluorometric micromethod, automated, for detection of transferase-deficiency galactosemia, 334

Folate binder, appearance of, in leukocytes and serum of women who are pregnant or taking oral contraceptives, 207
direct radiochemical assay for serum folate, competition between ^{3}H-folic acid and 5-methyltetrahydrofolic acid for, 164

G

Galactosemia, transferase-deficiency, automated fluorometric micromethod for detection of, 334
^{67}Gallium in chronic granulocytic leukemia, evidence for granulocytic incorporation of, 496
incorporation into inflammatory lesions, experimental and clinical studies, kinetics of, 489
Gastroesophageal reflux, pyloric incompetence in patients with symptomatic, 198
Gastrointestinal obstruction, congenital, hepatic bilirubin glucuronidation in neonates with unconjugated hyperbilirubinemia and, 90
Gel filtration technique for separation of erythrocytes from human blood, 840
Glands, salivary, and pancreas, amylase isoenzymes during viral infections of, 761
Globulin, antihemophiliac, in different bovine strains, antigenic differences in functionally normal, 467
Glomerular glycoprotein:galactosyl transferase activity in rat kidney, 271
Glomerulopathy, chronic autologous immune complex, effect of cyproheptadine, 695
Glucagon, pancreatic and total, serum glucose, free fatty acids, insulin, in man and in rat, neonatal changes in concentration of rat liver cyclic AMP and of, 957
Gluconeogenesis in cirrhotic liver of rat, effect of oleate or ethanol, 175
Glucose movement, electrolyte, and net water in perfused human ileum, effect of free and conjugated bile acids on, 947
Glutathione flux, erythrocyte, in vivo, relationship of, to oxidized glutathione transport system, 444
transport system, oxidized, relationship of in vivo erythrocyte glutathione flux to, 444
Glycerol lysis time as a screening test for erythrocyte disorders, 323
Glycoprotein:galactosyl transferase activity, glomerular, in rat kidney, 271
Glycoside, hydroxylysyl, excretions in normal and pathologic states, urinary hydroxylysine and, 673
Gold kinetics following aurothiomalate therapy, use of whole-body radiation counter, 778
Granulocyte preparations, oxygen consumption of phagocytizing cells in human leukocytes, a comparative study, 570
Granulocytic incorporation of ^{67}gallium in chronic granulocytic leukemia, evidence for, 496

H

Hematopoiesis of mice, effects of estrogens on hematopoietic stem cells and on, 807
Hemoglobins, a rapid method for the determination of hemoglobin A_2, microchromatography of, 657
A_{2}, microchromatography of hemoglobins, a rapid method for the determination of, 657
Heroin and morphine, elevated plasma histamine after, 451
Herpes zoster, monocyte disorder with, 768
^{3}H-folic acid and 5-methyltetrahydrofolic acid for a folate binder, direct radiochemical assay for serum folate, competition between, 164
Histamine, plasma, elevated, after heroin and morphine, 451
Hormone, parathyroid, double-antibody radioimmunoassay for, 129
in rat parathyroid, gland, radioimmunoassay for, 665
Horseradish peroxidase-labeled antibody, permanent preparations stained with, surface immunoglobulins on human peripheral lymphocytes, 584
Human experimentation, 1974, 339
Hydrolase, in vitro, and phagocytic activities of alveolar macrophages, 738
plasma acid, Leroy's I-cell disease, markedly increased activity of, 403
Hydroxylysine, urinary, and hydroxylysyl glycoside excretions in normal and pathologic states, 674
Hydroxylysyl glycoside excretions in normal and pathologic states, urinary hydroxylysine and, 673
Hyperbilirubinemia, unconjugated, and congenital gastrointestinal obstruction, hepatic bilirubin glucuronidation in neonates with, 90
Hypercholesterolemia, cholesterol synthesis by cultured fibroblasts, decreased feedback inhibition in familial, 7
Hyperinsulinism, basal and stimulated, reversible metabolic sequelae of obesity, 563
Hypertension, metal-induced, following chronic feeding of low doses of cadmium and mercury, 541
Hypoxia, myocardial ischemic, from lactate and pyruvate data during atrial pacing in humans, criteria for detecting, 428

I

I-cell disease, Leroy's, markedly increased activity of plasma acid hydrolases, 403
*I-fibrinogen labeled by four different methods, in vivo evaluation of, 977
IgE, human antibodies to, a simple method to avoid ambiguous results of radioimmunosorbent test (RIST), 831

Ileum, human effect of free and conjugated bile acids on net water, electrolyte, and glucose movement in the perfused, 947
Immunization, influenza, mechanisms of immunosuppression, effect of cyclophosphamide on responses to, 504
Immunoglobulins, surface, on human peripheral lymphocytes, permanent preparations stained with horseradish peroxidase-labeled antibody, 584
Immunosuppression, mechanisms of, effect of cyclophosphamide on responses to influenza immunization, 504
Immunotypes, Fisher-Devlin-Gnabasik, in sera, *pseudomonas* endocarditis, hemagglutinating antibodies to, 845
Infections, *pseudomonas*, heat-stable opsonins in sera of patients with, 853
viral, amylase isoenzymes during of pancreas and salivary glands, 761
Influenza immunization, mechanisms of immunosuppression, effect of cyclophosphamide on responses to, 504
Infusion, sodium chloride, pyrazinamide suppression of uricosuric response to, 417
Inhibitors, erythropoiesis, determination and physiologic effects of, 625
Insulin, serum glucose, free fatty acids, pancreatic, and total glucagon in man and in rat, neonatal changes in concentration of rat liver cyclic AMP and of, 957
Interstitial cell, renal papillary, ultrastructural analysis of, spontaneously hypertensive rats, 256
Intervertebral disc disease, fate of chymopapain injected for therapy of, 532
Intrarenal effects of phenoxybenzamine on sodium reabsorption, 263
Iron content, effect of, on behavior of human ferritin in an inhibition-type radioimmunoassay, 147
Ischemic myocardial hypoxia from lactate and pyruvate data during atrial pacing in humans, criteria for detecting 428
Isoenzymes, amylase, during viral infections of pancreas and salivary glands, 761

K

Kidney and maternal anemia, role of erythropoietin production in fetus, 271
glomerular glycoprotein:galactosyl transferase activity in, 271

L

Lactate and pyruvate data during atrial pacing in humans, criteria for detecting ischemic myocardial hypoxia from, 428
Leroy's I-cell disease, markedly increased activity of plasma acid hydrolases, 403
Lesions, inflammatory, experimental and clinical studies, kinetics of ^{67}gallium incorporation into, 489
renal, of mice with Bence Jones protein-producing tumors, effect of sustained diuresis on, 409
Leukemia, chronic granulocytic, evidence for granulocytic incorporation of ^{67}gallium in, 496
Leukocytes, appearance of folate binder in, and serum of women who are pregnant or taking oral contraceptives, 207
human, and granulocyte preparations, oxygen consumption of phagocytizing cells in, a comparative study, 570
peripheral, from rhesus monkeys with bacterial sepsis, deiodination of 1-thyroxine in vitro by, 902
polymorphonuclear, influence of phorbol myristate acetate on oxygen consumption by, 911
pyrogen, rabbit, further purification of, 310
Lidocaine, inhibition of platelet adherence to collagen-coated surface by nonsteroidal anti-inflammatory drugs, pyrimido-pyrimidine and tricyclic compounds, and, 797
Liver, cirrhotic, of rat, effect of oleate or ethanol, gluconeogenesis in, 175
elevated antihemophilic factor (AHF, factor VIII) procoagulant activity and AHF-like antigen in alcoholic cirrhosis of, 189
mitochondria, phosphorylative capacity of, with elevated ratio of cytochrome $c+c_1$ to cytochrome $a(+a_3)$, 97
Lung sensitivity, nitrofurantoin, report of a case with prolonged nitrofurantoin lymphocyte sensitivity and interaction of nitrofurantoin-stimulated lymphocytes with alveolar cells, 728
Lymphocytes, human peripheral, surface immunoglobulins on, permanent preparations stained with horseradish peroxidase-labeled antibody, 584
sensitivity, nitrofurantoin, and interaction of nitrofurantoin-stimulated lymphocytes with alveolar cells, nitrofurantoin lung sensitivity, report of a case with prolonged, 728

M

Macrophages, alveolar, in vitro hydrolase and phagocytic activities of, 738
Megathrombocyte, use of, to demonstrate a thrombopoietic stimulus, heterogeneity of rabbit platelets, 896
Mercaptans and ammonia or fatty acids in production of coma, possible role for mercaptans in the pathogenesis of hepatic coma, synergism between, 16
Mercury and cadmium, metal-induced hypertension following chronic feeding of low doses of, 541

Metabolic disorders, predictor for total body potassium in man based on height, weight, sex, and age, applications in, 716

Metabolism, calciferol, and intestinal calcium transport in chick with reduced renal function, 38

effect of cyanate upon 2,3-diphosphoglyceric acid, 577

oxidative energy, in skeletal muscle, biochemical and ultrastructural evidence for adaptive changes, 548

Metal-induced hypertension following chronic feeding of low doses of cadmium and mercury, 541

Methylprednisolone, cellular immunity after intravenous administration of, 383

5-Methyltetrahydrofolic acid for a folate binder, direct radiochemical assay for serum folate, competition between ^{3}H-folic acid and, 164

Mice, effects of estrogens on hematopoietic stem cells and on hematopoiesis of 807

Schistosoma mansoni-infected, variations in peripheral blood eosinophil levels in normal and, 871

thrombopoietic activity of fractions of rabbit plasma, studies in rabbits and, 364

with Bence Jones protein-producing tumors, effect of sustained diuresis on renal lesions of, 409

Microchromatography of hemoglobins, a rapid method for the determination of hemoglobin A_{2}, 657

Mitochondria, liver, phosphorylative capacity of, with elevated ratio of cytochrome c+c_{1} to cytochrome a(+a_{3}), 97

Monkeys, rhesus, acute airway obstruction induced by pharmacologic and immunologic stimuli, 749

rhesus, with bacterial sepsis, deiodination of 1-thyroxine in vitro by peripheral leukocytes from, 902

Monocyte disorder with herpes zoster, 768

release of colony-stimulating factor from, by endotoxin and polyinosinic-polycytidylic acid, 64

Morphine, elevated plasma histamine after heroin and, 451

Muscle, skeletal, oxidative energy metabolism in, biochemical and ultrastructural evidence for adaptive changes, 548

Myeloma, renal removal of low molecular weight proteins in, and renal transplant patients, 681

Myocardial hypoxia, ischemic, from lactate and pyruvate data during atrial pacing in humans, criteria for detecting, 428

N

NADH-dependent transketolase assay for assessing thiamine nutriture, improved, 983

Neonatal changes in concentration of rat liver cyclic AMP and of serum glucose, free fatty acids, insulin, pancreatic, and total glucagon in man and in the rat, 957

Neonates with unconjugated hyperbilirubinemia and congenital gastrointestinal obstruction, hepatic bilirubin glucuronidation in, 90

Newborns, serum, electrophoretic method for detection of unbound bilirubin and reserve bilirubin binding capacity in, 968

Nitrofurantoin lung sensitivity, report of a case with prolonged nitrofurantoin lymphocyte sensitivity and interaction of nitrofurantoin-stimulated lymphocytes with alveolar cells, 728

Nucleosides, methylated, quantitative determination of, and pseudouridine in urine by gas-liquid chromatography, 816

Nucleotides, cyclic, effects of, on human synovial cells in vitro, connective tissue activation, 46

Nutriture, thiamine, improved NADH-dependent transketolase assay for assessing, 983

O

Obesity, basal and stimulated hyperinsulinism, reversible metabolic sequelae of, 563

Obstruction, airway, acute, in rhesus monkeys induced by pharmacologic and immunologic stimuli, 749

congenital gastrointestinal, hepatic bilirubin glucuronidation in neonates with unconjugated hyperbilirubinemia and, 90

Oleate or ethanol, effect of, gluconeogenesis in cirrhotic liver of rat, 175

Opsonins, heat-stable, in sera of patients with *Pseudomonas* infections, 853

serum, alterations of, in patients with severe thermal injury, 372

Oral contraceptives, appearance of folate binder in leukocytes and serum of women who are pregnant or taking, 207

Osteoarthritis and pseudogout, elevated inorganic pyrophosphate concentrations in synovial fluids in, 518

Oxygen consumption and ammoniagenesis in isolated dog renal tubules, 937

by polymorphonuclear leukocytes, influence of phorbol myristate acetate on, 911

of phagocytizing cells in human leukocytes and granulocyte preparations, a comparative study, 570

Ozone and vitamin E, effect of, on pulmonary antibacterial defense mechanisms, 228

P

Pancreas and salivary glands, amylase isoenzymes during viral infections of, 761

Papillary interstitial cell, renal ultrastructural analysis of, spontaneously hypertensive rats, 256
Parathyroid hormone, double-antibody radioimmunoassay for, 129
in rat parathyroid gland, a radioimmunoassay for, 665
Partial release reaction on subsequent platelet function, effect of, 877
Penicillin and cephalexin, immunologic cross-reactivity of, 860
Phagocytic activities of alveolar macrophages, in vitro hydrolase and, 738
Phenoxybenzamine, intrarenal effects of, on sodium reabsorption, 263
Phorbol myristate acetate on oxygen consumption by polymorphonuclear leukocytes, influence of, 911
Plasma acid hydrolases, Leroy's I-cell disease, markedly increased activity of, 403
in man, derivation of, 393
bilirubin turnover and carbon monoxide production in man, comparison of, 29
bovine, factor VII-depleted, assay for coagulation factor VII using, 301
free fatty acids from dietary neutral fat in man, derivation of, 393
histamine, elevated, after heroin and morphine, 451
human, solid-phase radioassay for plasminogen in, 153
rabbit, studies in rabbits and mice thrombopoietic activity of fractions of, 364
renin activity, suppressed, during B-adrenergic blockade with propranolol, on the mechanism of, 119
concentration, comparison of angiotensinase inhibitors and correlation with plasma renin activity and aldosterone, 705
Plasmin, in vivo behavior of terminal derivatives of fibrinogen and fibrin cleaved by, 458
Plasminogen in human plasma, solid-phase radioassay for, 153
Platelet adherence, inhibition of, to collagen-coated surface by nonsteroidal anti-inflammatory drugs, pyrimido-pyrimidine and tricyclic compounds, and lidocaine, 797
adhesiveness and aggregation in rabbits, effect of estrogens and progestogen on, 79
aggregation after thermal injury, 355
decreased adhesion of, to subendothelium in von Willebrand's disease, 296
effect of prostaglandin E_1 on harvesting of, from refrigerated whole blood, 304
function, effect of partial release reaction on subsequent, 877
studies before and after operation and effect of postoperative thrombosis, 342
human, effect of concanavalin A on, response to thrombin, 887
rabbit, heterogeneity of, use of megathrombocyte to demonstrate thrombopoietic stimulus, 896
Pneumococcal antigens, diagnosis of bacterial diseases by detection of serum antigens by counterimmunoelectrophoresis, sensitivity, and specificity of detecting *Pseudomonas* and, 591
disease, human, antigens common to human and bacterial cells, studies of, 599
Polyinosinic-polycytidylic acid, release of colony-stimulating factor from monocytes by endotoxin and, 64
Potassium, body, total, predictor for, in man, based on height, weight, sex, and age, applications in metabolic disorders, 716
dietary, influence of, on renin and aldosterone response to diuretic-induced volume depletion, 249
Progestogen on platelet adhesiveness and aggregation in rabbits, effect of estrogen and, 79
Propranolol, on the mechanism of suppressed plasma-renin activity during β-adrenergic blockade with, 119
Prostaglandin E_1, effect of, on harvesting of platelets from refrigerated whole blood, 304
Protease activity, neutral, studies on crystal-induced chemotactic factor, requirement for protein synthesis and, 56
Proteins, low molecular weight, renal removal of, in myeloma and renal transplant patients, 681
synthesis and neutral protease activity, requirement for, studies on crystal-induced chemotactic factor, 56
Pseudogout, elevated inorganic pyrophosphate concentrations in synovial fluids in osteoarthritis and, 518
Pseudomonas and pneumococcal antigens, diagnosis of bacterial diseases by detection of serum antigens by counterimmunoelectrophoresis, sensitivity, and specificity of detecting, 591
endocarditis, hemagglutinating antibodies to Fisher-Devlin-Gnabasik immunotypes in sera, 845
infections, heat-stable opsonins in sera of patients with, 853
Pseudouridine in urine by gas-liquid chromatography, quantitative determination of methylated nucleosides and, 816
Pulmonary antibacterial defense mechanisms, effect of vitamin E and ozone on, 228
Pyloric incompetence in patients with symptomatic gastroesophageal reflux, 198
Pyrazinamide suppression of uricosuric response to sodium chloride infusion, 417
Pyrimido-pyrimidine and tricyclic compounds, and lidocaine, inhibition of platelet adherence to collagen-coated surface by nonsteroidal anti-inflammatory drugs, 797
Pyrogen, rabbit leukocyte, further purification of, 310

Pyrophosphate, elevated inorganic, concentrations in synovial fluids in osteoarthritis and pseudogout, 518
Pyruvate and lactate data during atrial pacing in humans, criteria for detecting ischemic myocardial hypoxia from, 428

R

Rabbit leukocyte pyrogen, further purification of, 310
plasma, studies in rabbits and mice, thrombopoietic activity of fractions of, 364
platelets, heterogeneity of, use of megathrombocyte to demonstrate thrombopoietic stimulus, 896
Radiation counter, whole-body, gold kinetics following aurothiomalate therapy, use of, 778
Radioassay, solid-phase, for plasminogen in human plasma, 153
Radiochemical assay, direct, from serum folate, competition between ^{3}H-folic acid and 5-methyltetrahydrofolic acid for a folate binder, 164
Radioimmunoassay, effect of iron content on behavior of human ferritin in an inhibition-type, 147
for parathyroid hormone, double-antibody, 129
in rat parathyroid gland, 665
Radioimmunosorbent test (RIST), human antibodies to IgE, a simple method to avoid ambiguous results of, 831
Rat fetal liver cells, lack of effect of erythropoietin on cyclic adenosine-3′,5′-monophosphate levels in, 288
gluconeogenesis in cirrhotic liver of, effect of oleate or ethanol, 175
liver cyclic AMP, neonatal changes in concentration of, and of serum glucose, free fatty acids, insulin, pancreatic, and total glucagon in man and in rat, 957
parathyroid gland, radioimmunoassay for parathyroid hormone in, 665
spontaneously hypertensive, ultrastructural analysis of renal papillary interstitial cell of, 256
Red cell cholesterol depletion and formation of spiculated cells in vivo, 436
Reflux, gastroesophageal, pyloric incompetence in patients with symptomatic, 198
Renal function, reduced, calciferol metabolism and intestinal calcium transport in chick with, 38
lesions of mice with Bence Jones protein-producing tumors, effect of sustained diuresis on, 409
papillary interstitial cell, ultrastructural analysis of, spontaneously hypertensive rats, 256
removal of low molecular weight proteins in myeloma and renal transplant patients, 681
transplant patients, renal removal of low molecular weight proteins in myeloma and, 681
Renal—Cont'd
tubules, dog, isolated, oxygen consumption and ammoniagenesis in, 937
Renin and aldosterone response to diuretic-induced volume depletion, influence of dietary potassium on, 249
concentration, plasma, comparison of angiotensinase inhibitors and correlation with plasma renin activity and aldosterone, 705
Responsibilities, what are our? 511
Rheologic studies of deoxygenated normal and hereditary spherocytosis blood and separated erythrocytes, 112
Rhesus monkeys, acute airway obstruction in, induced by pharmacologic and immunologic stimuli, 749

S

Salivary glands and pancreas, amylase isoenzymes during viral infections of, 761
Schistosoma mansoni-infected mice, variations in peripheral blood eosinophil levels in normal and, 971
Sepsis, bacterial, deiodination of 1-thyroxine in vitro by peripheral leukocytes from rhesus monkeys with, 902
Sera, heat-stable opsonins in, of patients with *pseudomonas* infections, 853
matched, anti-antibody and other anti-globulin specificities in nonrheumatoid and rheumatoid effusion fluids and, 104
normal human, role of antibody and heat-labile factors, opsonization of staphylococci by, 73
pseudomonas endocarditis, hemagglutinating antibodies to Fisher-Devlin-Gnabasik immunotypes in, 845
Serum antigens, detection of, by counter-immunoelectrophoresis, sensitivity, and specificity of detecting *Pseudomonas* and pneumococcal antigens, diagnosis of bacterial diseases by, 591
appearance of folate binder in leukocytes and, of women who are pregnant or taking oral contraceptives, 207
folate, competition between ^{3}H-folic acid and 5-methyltetrahydrofolic acid for a folate binder, direct radiochemical assay for 164
glucose, free fatty acids, insulin, pancreatic, and total glucagon in man and rat, neonatal changes in concentration of rat liver cyclic AMP and, 957
opsonins, alterations of, in patients with severe thermal injury, 372
Sickle-cell anemia, erythrocyte composition in, 611
disease, determination of blood concentrations of cyanate after intravenous administration to patients with, 139

Skeletal muscle, oxidative energy metabolism in, biochemical and ultrastructural evidence for adaptive changes, 548
Sodium chloride infusion, pyrazinamide suppression to uricosuric response to, 417
reabsorption, intrarenal effects of phenoxybenzamine on, 263
Spherocytosis blood, deoxygenated normal and hereditary, rheologic studies of, and separated erythrocytes, 112
Staphylococcal infection, experimental, therapy of, with antibiotic combinations, 241
Staphylococci, opsonization of, by normal human sera, role of antibody and heat-labile factors, 73
Stem cells, hematopoietic, effects of estrogens on, and on hematopoiesis of mice, 807
Stimulus, thrombopoietic, use of megathrombocyte to demonstrate, heterogeneity of rabbit platelets, 896
Subendothelium in von Willebrand's disease, decreased adhesion of platelets to, 296
Synergism between mercaptans and ammonia or fatty acids in the production of coma, possible role for mercaptans in pathogenesis of hepatic coma, 16
Synovial cells in vitro, human, connective tissue activation, effects of cyclic nucleotides on human synovial cells, 46
fluids in osteoarthritis and pseudogout, elevated inorganic pyrophosphate concentrations in, 518

T

Thermal injury, alterations of serum opsonins in patients with severe, 372
platelet aggregation after, 355
Thiamine nutriture, improved NADH-dependent transketolase assay for assessing, 983
Thombin, effect of concanavalin A on human platelets and response to, 887
Thrombopoietic activity of fractions of rabbit plasma, studies in rabbits and mice, 364
stimulus, use of megathrombocyte to demonstrate, heterogeneity of rabbit platelets, 896
Thrombosis, postoperative, platelet function studies before and after operation and effect of, 342
Thymidine kinase activity and incorporation of thymidine into DNA in zinc-deficient tissue, 634
l-Thyroxine, deiodination of, in vitro by peripheral leukocytes from rhesus monkeys with bacterial sepsis, 902
Tissue, connective, activation, effects of cyclic nucleotides on human synovial cells in vitro, 46
Tissue—Cont'd
retention of liposome-encapsulated chelating agents, preparation and prolonged, 640
zinc-deficient, thymidine kinase activity and incorporation of thymidine into, DNA in, 634
Transferase-deficiency galactosemia, automated fluorometric micromethod for detection of, 334
Transketolase assay for assessing thiamine nutriture, improved NADA- dependent, 983
Tubules, renal, dog, isolated, oxygen consumption and ammoniagenesis in, 937
Tumors, effect of sustained diuresis on renal lesions of mice with Bence Jones protein-producing, 409

U

Uricosuric response to sodium chloride, pyrazinamide suppression of, 417
Urinary fibrinogen-related material, methodologic aspects, measurement of, 921
hydroxylysine and hyroxylysyl glycoside excretions in normal and pathologic states, 673
Urine, quantitative determination of methylated nucleosides and pseudouridine in, by gas-liquid chromatography, 816

V

Vacuole formation, erythrocyte, mechanism of drug-induced, 215
Viral infections of pancreas and salivary glands, amylase isoenzymes during, 761
Vitamin E and ozone, effect of, on pulmonary antibacterial defense mechanisms, 228
K-3, colonic absorption of, 648
Volume depletion, diuretic-induced, influence of dietary potassium on renin and aldosterone response to, 249
von Willebrand's disease, decreased adhesion of platelets to subendothelium in, 296

W

Water, electrolyte, and glucose movement in perfused human ileum, effect of free and conjugated bile acids on, 947

Z

Zinc-deficient tissue, thymidine kinase activity and incorporation of thymidine into, DNA in, 634

Subject index*

A

Acetylcholine, histamine, and antigen in sensitized guinea pigs, airway responses to, 225

Acid-base homeostasis, alterations in, during water immersion in normal man, 777

lipase in cultured fibroblasts, cholesterol ester storage disease, 54

Adipose tissue of obese humans by clofibrate, suppression of activities of carbohydrate-metabolizing enzymes in, 698

Adrenocorticosteroid pretreatment, effect of, on kinin system and coagulation response to septic shock in baboon, 731

Agar volume, inoculum size, and Hepes buffer on size of T-mycoplasmal colonies, effect of, 766

Agglutination, slide, fluorescence microscopy, and microimmunodiffusion, serotyping of group B streptococci by, 594

Airway responses to histamine, acetylcholine, and antigen in sensitized guinea pigs, 225

Alpha$_1$-antitrypsin concentration in serum of laboratory animals, changes following proteolytic enzyme injection, 813

δ-Aminolevulinic acid synthetase activity in experimental sideroblastic anemia, bone marrow, 92

AMP, cyclic, platelet functions after intravenous administration in man of, and related drugs, 828

dibutyryl cyclic, and cytotoxic lymphocytes in Hashimoto's disease, 459

Amyloid fibrils, formation of, in vitro by action of human kidney lysosomal enzymes on Bence-Jones proteins, 107

P-component (pentagonal unit) of, isolation, characterization, and sequence analysis of, 604

Anemia of inflammation, bone marrow erythropoiesis in, 620

relationship of thrombocytosis and, 357

sickle cell, effects of dromostanolone in, 889

sideroblastic, bone marrow δ-aminolevulinic acid synthetase activity in experimental, 92

Anhydrases, carbonic, from human neonatal erythrocytes, 369

Antibodies, antithyroglobulin, radioimmunologic assay for, 907

precipitating, in hypersensitivity pneumonitis, multilaboratory comparison of three immunodiffusion methods used for detection of, 298

Antibody titer, cytolytic, and specificity, direct determination of, 425

Anticoagulants, chemotactic activity of human granulocytes preserved in various, 902

Antigen, histamine, and acetylcholine in sensitized guinea pigs, airway responses to, 225

Antihemophilic factor (AHF, factor VIII), studies on, during labor in normal women, in patients with premature separation of the placenta, and in a patient with von Willebrand's disease, 851

Antiplatelet factor in ATP and SLE, simplified platelet factor 3 assay for rapid detection of platelet isoantibodies and, 292

Antithyroglobulin antibodies, radioimmunologic assay for, 907

Arylsulfatase A deficiency in bone marrow fibroblasts of two different forms of metachromatic leukodystrophy, 49

ATP and SLE, simplified platelet factor 3 assay for rapid detection of platelet isoantibodies and an antiplatelet factor in, 292

B

Baboon, effect of adrenocorticosteroid pretreatment on kinin system and coagulation response to septic shock in, 731

Bence-Jones proteins, formation of amyloid fibrils in vitro by action of human kidney lysosomal enzymes on, 107

Bile acids, 2,4-^{3}H-labeled, validity of using, to study bile acid kinetics in man, 759

Biopsy, endomyocardial, serum enzyme activity following cardiac catheterization and, 6

Blood cell abnormalities complicating hypophosphatemia of hyperalimentation, erythrocyte and platelet ATP deficiency associated with hemolytic anemia and bleeding in hyperalimented dogs, 643

coagulation, contact phase of, clotting factors XI and XII, isolation and interaction, 861

extracorporeal treatment of, with cyanate in primates, physiologic and toxicologic observations, 81

vessels, urine, heart, and tissue culture, human, immunologic identity of plasminogen factor in, 546

Bone marrow and spleen cell suspension from rats with acute myelogenous leukemia, in vitro colony formation in, 249

*July, pp. 1-152; August, pp. 153-306; September, pp. 307-458; October, pp. 459-614; November, pp. 615-776; December, pp. 777-950.

Bone marrow—Cont'd
δ-aminolevulinic acid synthetase activity in experimental sideroblastic anemia, 92
erythropoiesis in anemia of inflammation, 620
fibroblasts of two different forms of metachromatic leukodystrophy, arylsulfatase A deficiency in, 49
Bronchial lavage, analysis of proteins and respiratory cells obtained from human lungs by, 559
Brush-border peptide hydrolases in luminal disappearance of dipeptides in man, assessment of role of, 327

C

Calcium absorption, impaired, in uremic man, evidence for defective absorption in proximal small intestine, 791
Carbohydrate-metabolizing enzyme, suppression of activities of, in adipose tissue of obese humans by clofibrate, 698
Carbonic anhydrases from human neonatal erythrocytes, 369
Carboxypeptidase B, pancreatic, in human serum, radioimmunoassay for, 574
Cardiac catheterization and endomyocardial biopsy, serum enzyme activity following, 6
Cardiomyopathy, lead, experimental, myocardial structural changes in rats given small amounts of lead, 20
Cartilage, iliac crest, glycosaminoglycans of, in normal children and in Morquio's disease, 465
Catabolism, hydrogen (H_2), in colon of rat, 163
of erythropoietin in rat, role of kidney in, 99
Catheterization, cardiac, and endomyocardial biopsy, serum enzyme activity following, 6
Cell accumulation using adoptively transferred ^{51}Cr-labeled cells, description of model of, leukocyte chemotaxis in vivo, 378
density and in vitro changes in hemoglobin concentration, erythrocyte O_2 affinity, influence of, 218
Cellular transport, pyridoxal 5'-phosphate in plasma, source, protein-binding, and, 334
Chandler rotating loop system, examination of fluid mechanics and thrombus formation time parameters, 494
Chemotactic activity of human granulocytes preserved in various anticoagulants, 902
Chloride and potassium ions, renal citrate in potassium-deficient rat, role of, 307
Cholesterol ester storage disease, acid lipase in cultured fibroblasts, 54
plasma, comparison of capillary and venous blood sampling for quantitation of, 281
Chromatography, high-pressure liquid, nucleotide profiles of normal and abnormal platelets by, 839
Chromatography—Cont'd
liquid, high-pressure, determination of theophylline and its metabolites in, 584
Chromosomes and lysergic acid, studies on mechanism of interaction between, 36
Citrate, renal, in potassium-deficient rat, role of potassium and chloride ions, 307
Clofibrate, suppression of activities of carbohydrate-metabolizing enzymes in adipose tissue of obese humans by, 698
Clot retraction, inhibition of platelet adherence to collagen-coated surface by agents that inhibit platelet shape change and, 483
Coagulation, blood, contact phase of, clotting factors XI and XII, isolation and interaction, 861
intravascular, studies during saline infusion of effects of, on rabbit kidney function, 525
response, effect of adrenocorticosteroid pretreatment on kinin system and, to septic shock in baboon, 731
Collagen, role of vitreous, in platelet aggregation in vitro and in vivo, 264
Colon, rat, catabolism of hydrogen (H_2) in, 163
^{51}Cr-labeled cells, description of model of cell accumulation using adoptively transferred, leukocyte chemotaxis in vivo, 378
Cyanate, extracorporeal treatment of blood with, in primates, physiologic and toxicologic observations, 81
Cyclic-AMP and aggregation in human platelets, evidence for a common prostaglandin receptor, interaction of prostaglandins E_1 and E_2 in regulation of, 111
platelet functions after intravenous administration in man of, and related drugs, 828

D

Densitometry, quantitation of fetal hemoglobin by, 740
Density gradient, simplified, separation of erythrocytes according to age on, 147
Dibutyryl cyclic AMP and cytotoxic lymphocytes in Hashimoto's disease, 459
Digoxin levels, serum, elevated, treatment of, with penicillamine, an experimental study, 823
Dimethylsulfoxide-treated Friend leukemic cells in vitro, erythropoietin-induced stimulation of heme synthesis by, 667
Dipeptides in man, assessment of role of brush-border peptide hydrolases in luminal disappearance of, 327
Dogs, blood cell abnormalities complicating the hypophosphatemia of hyperalimentation, erythrocyte and platelet ATP deficiency associated with hemolytic anemia and bleeding in hyperalimented, 643

DOPA, automated radiometric assays of enzymatic and nonenzymatic oxidation of, in vitro, 287
Dromostanolone, effects of, in sickle cell anemia, 889
Dyphylline in serum, specific gas chromatographic method for determination of, 451
Dysprothrombinemia, prothrombin Padua, a new congenital, 654

E

Electrodes, pacemaker, intracardiac, or polyethylene tubing, susceptibility to *Streptococcus viridans* endocarditis in rabbits with, 726
Endocarditis, *Streptococcus viridans*, in rabbits with intracardiac pacemaker electrodes of polyethylene tubing, susceptibility to, 726
Endomyocardial biopsy, serum enzyme activity following cardiac catheterization and, 6
Endothelial cells, human, radiosensitivity of, 42
Enzymes, carbohydrate-metabolizing, suppression of activities of, in adipose tissue of obese humans by clofibrate, 698
lysosomal, on Bence-Jones proteins, formation of amyloid fibrils in vitro by action of human kidney, 107
proteolytic, injection, changes following, alpha$_1$-antitrypsin concentration in serum of laboratory animals, 813
serum, activity following cardiac catheterization and endomyocardial biopsy, 6
Erythrocytes, glycerol lysis time of incubated, in diagnosis of hereditary spherocytosis, 746
human, hypotonic exchange loading of, with ^{59}Fe-labeled rabbit hemoglobin, 879
human neonatal, carbonic anhydrases from, 369
O_2 affinity, influence of cell density and in vitro changes in hemoglobin concentration, 218
separation of, according to age on simplified density gradient, 147
Erythropoiesis, bone marrow, in anemia of inflammation, 620
Erythropoietin-induced stimulation of heme synthesis by dimethylsulfoxide-treated Friend leukemic cells in vitro, 667
in rat, role of kidney in catabolism of, 99
Estrogen, hormonally influenced human serum globulin, elevation of Xh by, 187
Exchange loading, hypotonic, of human erythrocytes with ^{59}Fe-labeled rabbit hemoglobin, 879
Extracorporeal treatment of blood with cyanate in primates, physiologic and toxicologic observations, 81

F

Factor VIII, cold-insoluble globulin of plasma and its relationship to, 258
Factor XIII consumption as an indicator of thrombin generation, 74
Fetal hemoglobin, quantitation of, by densitometry, 740
Fibrils, amyloid, formation of, in vitro by action of human kidney lysosomal enzymes on Bence-Jones protein, 107
Fibrin complexes, soluble, in experimental thrombotic states, 168
Fibrinogen heterogeneity in human plasma, electrophoretic demonstration and characterization of two major fibrinogen components, 509
Fibroblasts, bone marrow, of two different forms of metachromatic leukodystrophy, arylsulfatase A deficiency in, 49
cultured, acid lipase in, cholesterol ester storage disease, 54
Fluid mechanics, examination of, and thrombus formation time parameters in Chandler rotating loop system, 494
Fluorescence microscopy, slide agglutination, and microimmunodiffusion, serotyping of group B streptococci by, 594
Friend leukemic cells, dimethylsulfoxide-treated, in vitro, erythropoietin-induced stimulation of heme synthesis by, 667

G

Gas chromatographic method, specific, for determination of dyphylline in serum, 451
Gastric secretion and peptic ulcer formation, effect of synthetic 15-methyl analog of prostaglandin E_2 on, 716
Globulin, cold-insoluble, of plasma and its relationship to factor VIII, 258
human serum, hormonally influenced, elevation of Xh by estrogen, 187
Glucose, normal, insulin, and growth hormone responses to oral glucose in Huntington's disease, 807
6-phosphate dehydrogenase, red cell, deficiency in Egypt, heterogeneity of, 673
Glycerol lysis time of incubated erythrocytes in diagnosis of hereditary spherocytosis, 746
Glycogenosis Type VI, liver phosphorylase deficiency in, documentation by biochemical analysis of hepatic biopsy specimens, 26
Glycoprotein quantitation by radial immunodiffusion, normal patterns, Tamm-Horsfall urinary, 771
Glycosaminoglycans of iliac crest cartilage in normal children and in Morquio's disease, 465
Granulocytes, chemotactic activity of human, preserved in various anticoagulants, 902
Growth hormone and polyol pathway, 802
hormone, normal glucose, and insulin responses to oral glucose in Huntington's disease, 807

Guinea pigs, sensitized, airway responses to histamine, acetylcholine, and antigen in, 225

H

Hageman factor (Factor XII), inhibition of the adsorption of, to glass by normal human plasma, 62
Hashimoto's disease, dibutyryl cyclic-AMP and cytotoxic lymphocytes in, 459
Heart, urine, blood vessels, and tissue culture, human, immunologic identity of plasminogen factor in, 546
Heme synthesis, erythropoietin-induced stimulation of, by dimethylsulfoxide-treated Friend leukemic cells in vitro, 667
Hemoglobin concentration, erythrocyte O_2 affinity, influence of cell density and in vitro changes in, 218
fetal, quantitation of, by densitometry, 740
Hope (α_2 $\beta_2^{136\text{-gly-asp}}$)-S disease, clinical and biochemical studies, 632
oxygen affinity, effects on, of smoking in residents of intermediate altitudes, 191
rabbit, ^{59}Fe-labeled, hypotonic exchange loading of human erythrocytes with, 879
Heparin, bonding of, in vitro and in vivo to plasma proteins, 344
Hepatic biopsy specimens, liver phosphorylase deficiency in glycogenosis Type VI, documentation by biochemical analysis of, 26
Hepes buffer, agar volume, and inoculum size, on size of T-mycoplasmal colonies, effect of, 766
Histamine, acetylcholine, and antigen in sensitized guinea pigs, airway responses to, 225
Homeostasis, acid-base, alterations in, during water immersion in normal man, 777
Hormone, luteinizing, overnight radioimmunoassay for, 129
Huntington's disease, normal glucose, insulin and growth hormone responses to oral glucose in, 807
Hydrogen (H_2) catabolism in colon of rat, 163
Hydrolases, brush-border peptide, in luminal disappearance of dipeptides in man, assessment of role of, 327
Hyperalimentation, hypophosphatemia of, blood cell abnormalities complicating, erythrocyte and platelet ATP deficiency associated with hemolytic anemia and bleeding in hyperalimented dogs, 643
Hypophosphatemia of hyperalimentation, blood cell abnormalities complicating, erythrocyte and platelet ATP deficiency associated with hemolytic anemia and bleeding in hyperalimented dogs, 643
Hypotonic exchange loading of human erythrocytes with ^{59}Fe-labeled rabbit hemoglobin, 879
Hypoxemia, comparison of factors regulating red cell 2,3-diphosphoglycerate in acute and chronic, 275

I

Iliac crest cartilage, glycosaminoglycans of, in normal children and in Morquio's disease, 465
Immunodiffusion methods, multilaboratory comparison of three, used for detection of precipitating antibodies in hypersensitivity pneumonitis, 298
radial, Tamm-Horsfall urinary glycoprotein quantitation by, normal patterns, 771
Immunologic identity of plasminogen activator in human urine, heart, blood vessels, and tissue culture, 546
Inoculum size, agar volume, and Hepes buffer, on size of T-mycoplasmal colonies, effects of, 766
Inflammation, anemia of, bone marrow erythropoiesis in, 620
Insulin, extraction of from urine, convenient method for, 752
normal glucose, and growth hormone responses to oral glucose in Huntington's disease, 807
Intestinal mitochondrial activity, effect of chronic uremia on, 317
Isotopes, whole-body counting, analysis of retention data for, 1

K

Kidney function, rabbit, studies during saline infusion of effects of intravascular coagulation on, 525
human, formation of amyloid fibrils in vitro by action of, lysosomal enzymes on Bence-Jones proteins, 107
role of, in catabolism of erythropoietin in rat, 99
Kinetics, platelet, in neoplasia, thrombocytosis, 615
Kinin system, effect of adrenocorticosteroid pretreatment on, and coagulation response to septic shock in baboon, 731
Krebs-Henseleit enzymes, activities of, in normal and cirrhotic human liver, 708

L

Labor in normal women, studies on antihemophilic factor (AHF, factor VIII) during, in patients with premature separation of the placenta, and in a patient with von Willebrand's disease, 851
Lavage, bronchial, analysis of proteins and respiratory cells obtained from human lungs by, 559
Lead cardiomyopathy, experimental, myocardial structural changes in rats given small amounts of lead, 20
Leukemia, acute myelogenous, in vitro colony formation in bone marrow and spleen cell suspensions from rats with, 249

Leukocyte chemotaxis in vivo. I. Description of model of cell accumulation using adoptively transferred ^{51}Cr-labeled cells, 378
II. Analysis of selective inhibition of neutrophil on mononuclear cell accumulation, 394
in vitro thymidine uptake by circulating, 681
Leukodystrophy, metachromatic, arylsulfatase A deficiency in bone marrow fibroblasts of two different forms of, 49
Liquid chromatography, high-pressure, determination of theophylline and its metabolites in, 584
Liver, human, activities of Krebs-Henseleit enzymes in normal and cirrhotic, 708
phosphorylase deficiency in glycogenosis Type VI, documentation by biochemical analysis of hepatic biopsy specimens, 26
Lungs, human, analysis of proteins and respiratory cells obtained from by bronchial lavage, 559
Luteinizing hormone, overnight radioimmunoassay for, 129
Lymphocyte blast, inhibition of human, transformation by streptolysin O, 241
cytotoxic, and dibutyryl cyclic-AMP in Hashimoto's disease, 459
Lysergic acid and chromosomes, studies on mechanism of interaction between, 36

M

Magnesium metabolism in rat with chronic renal failure, 536
stores, body, evaluation of, 153
Mice, experimental staphylococcal toxic epidermal necrolysis in adult humans and, 414
Microimmunodiffusion, slide agglutination, and fluorescence microscopy, serotyping of group B streptococci by, 594
Microscopy, fluorescence, slide agglutination, and microimmunodiffusion, serotyping of group B streptococci by, 594
Mitochondrial activity, intestinal, effect of chronic uremia on, 317
Morquio's disease, glycosaminoglycans of iliac crest cartilage in normal children and in, 465
Myelogenous leukemia, acute, in vitro colony formation in bone marrow and spleen cell suspensions from rats with, 249
Myocardial structural changes in rats given small amounts of lead, experimental lead cardiomyopathy, 20

N

Necrolysis, experimental staphylococcal toxic epidermal, in adult humans and mice, 414
Neonatal erythrocytes, human, carbonic anhydrases from, 369
Neoplasia, platelet kinetics in, thrombocytosis, 615
Neutrophil or mononuclear cell accumulation, analysis of selective inhibition of, leukocyte chemotaxis in vivo, 394
Nicotinic acid, pharmacologic effects of, on human purine metabolism, 179
Nucleotide profiles of normal and abnormal platelets by high-pressure liquid chromatography, 839

O

Opossum pouch young, weanlings, and mothers, pulmonary oxygen toxicity in, preliminary observations, 206
Opsonins, heat-stable, staphylococcal, 122
Oxidation, enzymatic and nonenzymatic, of DOPA in vitro, automated radiometric assays of, 287
Oxygen affinity, erythrocyte, influence of cell density and in vitro changes in hemoglobin concentration, 218
hemoglobin affinity, effects on, of smoking in residents of intermediate altitudes, 191
toxicity, pulmonary, in opossum pouch young, weanlings, and mothers, preliminary observations, 206

P

Pacemaker electrodes, intracardiac, or polyethylene tubing, susceptibility to *Streptococcus viridans* endocarditis in rabbits with, 726
Pancreatic carboxypeptidase B in human serum, radioimmunoassay for, 574
P-component (pentagonal unit) of amyloid, isolation, characterization, and sequence analysis, 604
Penicillamine, treatment of elevated serum digoxin levels with, an experimental study, 823
Peptic ulcer formation and gastric secretion, effect of synthetic 15-methyl analog of prostaglandin E_2 on, 716
Peptide hydrolases, brush-border, in luminal disappearance of dipeptides in man, assessment of role of, 327
Placenta, patients with premature separation of, studies on antihemophilic factor (AHF, factor VIII) during labor in normal women, and in a patient with von Willebrand's disease, 851
Plasma cholesterol, comparison of capillary and venous blood sampling for quantitation of, 281
cold-insoluble globulin of, and its relationship to factor VIII, 258
human, fibrinogen heterogeneity in, electrophoretic demonstration and characterization to two major fibrinogen components, 509
normal human, inhibition of adsorption of Hageman factor (Factor XII) to glass by, 62
proteins, bonding of heparin in vitro and in vivo, 344
pyridoxal 5'-phosphate in, source, protein-binding, and cellular transport, 334

Plasminogen activator, immunologic identity of, in human urine, heart, blood vessels, and tissue culture, 546
Platelet adherence, inhibition of, to collagen-coated surface by agents that inhibit platelet shape change and clot retraction, 483
aggregation in vitro and in vivo, role of vitreous collagen in, 264
determination of fluid volume of, by separation through silicone oil, 926
factor-3 availability and platelet release reaction, 474
simplified, assay for rapid detection of platelet isoantibodies and an antiplatelet factor in ATP and SLE, 292
functions after intravenous administration in man of cyclic-AMP and related drugs, 828
human, evidence for common prostaglandin receptor, interaction of prostaglandins E_1 and E_2 in regulation of cyclic-AMP and aggregation in, 111
kinetics in neoplasia, thrombocytosis, 615
normal and abnormal, nucleotide profiles of, by high-pressure liquid chromatography, 839
release reaction, platelet factor-3 availability, 474
Pneumonitis, hypersensitivity, multilaboratory comparison of three immunodiffusion methods used for detection of precipitating antibodies in, 298
Polyol pathway, growth hormone and, 802
Potassium and chloride ions, renal citrate in potassium-deficient rat, role of, 307
Pregnancy testing, study on advisability of routine hospital, 920
Primates, extracorporeal treatment of blood with cyanate in, physiologic and toxicologic observations, 81
Prostaglandins E_1 and E_2, interaction of, in regulation of cyclic-AMP and aggregation in human platelets, evidence for a common prostaglandin receptor, 111
E_2, effect of synthetic 15-methyl analog of, on gastric secretion and peptic ulcer formation, 716
Proteins and respiratory cells, analysis of, obtained from human lungs by bronchial lavage, 559
plasma, bonding of heparin in vitro and in vivo, 344
retinol-binding, in rat, effect of zinc deficiency on metabolism of, 692
Proteolytic enzyme injection, changes following, alpha$_1$-antitrypsin concentration in serum of laboratory animals, 813
Prothrombin Padua, a new congenital dysprothrombinemia, 654
Pulmonary oxygen toxicity in opossum pouch young, weanlings, and mothers, preliminary observations, 206
Purine metabolism, human, pharmacologic effects of nicotinic acid on, 179
Pyridoxal 5′-phosphate in plasma, source, protein-binding, and cellular transport, 334

R

Rabbit hemoglobin, ^{59}Fe-labeled, hypotonic exchange loading of human erythrocytes with, 879
kidney function, studies during saline infusion of effects of intravascular coagulation on, 525
susceptibility to *Streptococcus viridans* endocarditis in, with intracardiac pacemaker electrodes or polyethylene tubing, 726
Radioimmunoassay for pancreatic carboxypeptidase B in human serum, 574
overnight, for human luteinizing hormone, 129
Radioimmunologic assay for antithyroglobulin antibodies, 907
Radiometric assays, automated, of enzymatic and nonenzymatic oxidation of DOPA in vitro, 287
Radiosensitivity of human endothelial cells in culture, 42
Rat colon, catabolism of hydrogen (H_2) in, 163
effect of zinc deficiency on metabolism of retinol-binding protein in, 692
in vitro colony formation in bone marrow and spleen cell suspensions from, with an acute myelogenous leukemia, 249
myocardial structural changes in, given small amounts of lead, experimental lead cardiomyopathy, 20
renal citrate in potassium-deficient, role of potassium and chloride ions, 307
role of kidney in catabolism of erythropoietin in, 99
with chronic renal failure, magnesium metabolism in, 536
Red cell destruction in spleen, measurement of, 134
2,3-diphosphoglycerate, comparison of factors regulating, in acute and chronic hypoxemia, 275
Renal citrate in potassium-deficient rat, role of potassium and chloride ions, 307
failure, chronic, magnesium metabolism in rat with, 536
Renografin gradients, isolation of a reticulocyte-rich fraction from normal human blood on, 517
Respiratory cells and proteins, analysis of, obtained from human lungs by bronchial lavage, 559
Retention data, analysis of, for isotopes, whole-body counting, 1
Reticulocyte-rich fraction, isolation of a, from normal human blood on Renografin gradients, 517

S

Saline infusion, studies during, of the effects of intravascular coagulation on rabbit kidney function, 525
Sanfilippo disease, differentiation of types A and B by analytical method, 438

Septic shock in baboon, effect of adrenocorticosteroid pretreatment on kinin system and coagulation reponse to, 731
Serotyping of group B streptococci by slide agglutination, fluorescence microscopy, and microimmunodiffusion, 594
Serum digoxin levels, elevated, treatment of, with penicillamine, an experimental study, 823
enzyme activity following cardiac catheterization and endomyocardial biopsy, 6
globulin, human, hormonally influenced, elevation of Xh by estrogen, 187
human, radioimmunoassay for pancreatic carboxypeptidase B in, 574
specific gas chromatographic method for determination of dyphylline in, 451
Shock, septic, in baboon, effect of adrenocorticosteroid pretreatment on kinin system and coagulation response to, 731
Sickle cell anemia, effects of dromostanolone in, 889
Sideroblastic anemia, bone marrow δ-aminolevulinic acid synthetase activity in experimental, 92
Silicone oil, determination of fluid volume of platelets by separation through, 926
SLE and ATP, simplified platelet factor 3 assay for rapid detection of platelet isoantibodies and an antiplatelet factor in, 992
Slide agglutination, fluorescence microscopy, and microimmunodiffusion, serotyping of group B streptococci by, 594
Small intestine, proximal, impaired calcium absorption in uremic man, evidence for defective absorption in, 791
Spherocytosis, hereditary, glycerol lysis time of incubated erythrocytes in diagnosis of, 746
Spleen cell and bone marrow suspensions from rats with acute myelogenous leukemia, in vitro colony formation in, 249
measurement of red cell destruction in, 129
Staphylococcal heat-stable opsonins, 122
Streptococci, group B, serotyping of, by slide agglutination, fluorescence microscopy, and microimmunodiffusion, 594
Streptococcus viridans endocarditis in rabbits with intracardiac pacemaker electrodes or polyethylene tubing, susceptibility to, 726
Streptolysin O, inhibition of human lymphocyte blast transformation by, 241
Streptozotocin, clinical and pathological effects of, 407

T

Tamm-Horsfall urinary glycoprotein quantitation by radial immunodiffusion, normal patterns, 771
Theophylline, determination of, and its metabolites in human urine and serum by high-pressure liquid chromatography, 584
Thrombin generation, factor XIII consumption as an indicator of, 74
Thrombocytosis, platelet kinetics in neoplasia, 615
Thrombocytosis, relationship of anemia and, 357
Thrombotic states, soluble fibrin complexes in experimental, 168
Thrombus formation time parameters in Chandler rotating loop system, examination of fluid mechanics and, 494
Thymidine uptake, in vitro, by circulating leukocytes, 681
Tissue culture, urine, heart, and blood vessels, human, immunologic identity of plasminogen factor, 546
Titer, cytolytic antibody, and specificity, direct determination of, 425
T-mycoplasmal colonies, effect of agar volume, inoculum size, and Hepes buffer on size of, 766

U

Uremia, chronic, on intestinal mitochondrial activity, effect of, 317
Urine and serum, human, determination of theophylline and its metabolites in, by high-pressure liquid chromatography, 584
convenient method for extraction of insulin from, 752
heart, blood vessels, and tissue culture, human, immunologic identity of plasminogen factor in, 546

V

V_{max}, simplified method for calculating, 235
von Willebrand's disease, studies on antihemophilic factor (AHF, factor VIII) during labor in normal women, in patients with premature separation of the placenta, and in a patient with, 851

W

Water immersion in normal man, alterations in acid-base homeostasis during, 777
Whole-body counting, analysis of retention data for isotopes, 1

X

Xh, elevation of, by estrogen, hormonally influenced human serum globulin, 187

Z

Zinc deficiency on metabolism of retinol-binding protein in rat, effect of, 692
